Eagle 39, Jacksonville.

The corrected reading of the barometer (reduced to sea level) at New York on Wednesday, July 13, 1921, at 8 AM, as reported by the United States Weather Bureau, was thirty and six hundredths (30,06) inches. This closely approximates seven hundred and sixty-three and five-tenths (763,5) millimeters. Captains of all vessels now lying in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether thair own barometers require any considerable correction or adjustment. or adjustment.
